### **The lesson planning and instruction process**

1. Read the lesson and reflect on its significance to you and your students.
2. Review the standards, benchmarks and indicators that are addressed in the lesson for the grade level you teach so the objectives are clearly in your mind.
3. Review examples of formal assessments used in the past so that your work with students reflects future expectations of performance. Note: the questions may take different forms, and performance on multiple-choice questions alone is usually not sufficient to pass.
4. Check Interdisciplinary Connections activities to see if other subjects can be included in a team approach.
5. Design a lesson that makes use of the best resources and will motivate your students to attain the benchmarks and indicators.
6. Check Differentiated Learning to consider adaptations to the lesson.
7. Prepare informal assessments. Many times, these are included in the Web-based lesson.
8. Record any reflections you might have about future use of the same lesson.
