This Event is brought to you for free and open access by the University Libraries’ Events at CORE Scholar. It has been accepted for inclusion in Ohio IR Day by an authorized administrator of CORE Scholar. For more information, please contact library-corescholar@wright.edu.
Open Access & Copyright

Cindy Kristof
Head, Copyright and Document Services
Kent State University
Ohio IR Day – Friday, October 23, 2015
Happy Open Access Week!
Exclusive Rights – Section 106

Copyright Law gives copyright holders a limited monopoly over their works, to serve as an incentive for authors and creators. The rights include the following:

1. Reproduce the work in copies
2. Distribute the work publicly
3. Make derivative works
4. Publicly display the work
5. Public performance
6. Public performance by means of a digital audio transmission

(Source: § 106, Title 17 U.S. Code at http://www.copyright.gov/title17/)
With Open Access “…the bills are not paid by readers and hence do not function as access barriers.”

BBB Definitions of OA

• Budapest – “...free availability on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the full texts of these articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose, without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself. The only constraint on reproduction and distribution, and the only role for copyright in this domain, should be to give authors control over the integrity of their work and the right to be properly acknowledged and cited.”

• Bethesda & Berlin – For a work to be OA, the copyright holder must consent in advance to let users "copy, use, distribute, transmit and display the work publicly and to make and distribute derivative works, in any digital medium for any responsible purpose, subject to proper attribution of authorship....“

Mythology

“Circe Surfs the Web, after John William Waterhouse” by Mike Licht – licensed under CC BY 2.0.
Mythology

• “Open Access articles aren’t copyrighted.”
  • Whether or not a work is registered with copyright.gov, any original work of authorship is copyrighted once it’s in a fixed and tangible medium.
  • Authors publishing in Open Access journals can and do retain their own copyrights.
  • Authors can license their works under Creative Commons licenses to allow sharing.

• “Open Access articles aren’t protected.”
  • Any work can be plagiarized, whether it is published through traditional means or in an Open Access environment.
  • There are no known cases in which a publisher has used copyright law in order to protect integrity on behalf of an author.
  • Copyright is, however, used by traditional publishers to protect their business model and ensure profits.

Copyright Models Compared

• **Traditional**
  • Author transfers the copyrights to the journal publisher by signing a Copyright Transfer Agreement (CTA)
  • May negotiate some rights to retain (e.g., distribute via electronic course reserves)

• **Open Access**
  • Author keeps the rights
  • Author shares rights
    • Usually using a Creative Commons license
  • Author transfers only the exploitation rights to the journal
