Family Practice Program

Frederick A. White
Center for
Ambulatory Care

Comprehensive Care at the Frederick A. White Center

Family-oriented care is available at the center in the family practice module. The staff of ten physicians and four psychologists is composed of full-time members of the Department of Family Practice in the School of Medicine.

The department functions as a group practice. All eligible physicians are board certified in Family Practice, and some have additional certification (preventive medicine, pediatrics, adolescent medicine). We offer care to all members of the family, including pre-natal and obstetrical services.

In addition to office practice, we follow our patients if they need to be hospitalized. Our hospital affiliations include Children's Medical Center, St. Elizabeth's Medical Center, Miami Valley Hospital, and Greene Memorial Hospital. There is a physician on call at all times including after hours and weekends.

We offer a full range of comprehensive health care from prospective (health maintenance, pap smears, well-baby checks) to acute services (casting fractures, suturing lacerations). There is a fully equipped lab and X-ray equipment on the premises to handle both routine and emergency problems.

The four clinical psychologists function as an integral part of our family practice team. Their services include psychological assessment, individual therapy, marriage counseling, and family therapy. Patients may either contact them directly or seek referral through their family physician.

If you have any questions or wish an appointment with one of our physicians or psychologists, we may be reached at 873-2300, 873-3393, or 873-3394.
